

Technology	Proven Chemistry	Proven Biology	Potential Applications
<p>KODE™-SYN</p> <p>Water dispersible synthetic constructs used to effect qualitative and quantitative changes in the level of carbohydrate antigen expressed at the surface of cells and multi-cellular structures.</p>			<p>Quality control cells (SECURACELL™)</p> <p>Immunomodulation</p>
<p>KODE™-FEM II</p> <p>Water dispersible synthetic constructs used to localize hyaluronic acid to the surface of liposomes, cells and multi-cellular structures.</p>			<p>Fertility enhancement</p> <p>Liposomes/drug delivery</p>
<p>KODE™-Fluorophore</p> <p>Water dispersible synthetic constructs used to localize fluorophores to the surface of cells and multi-cellular structures.</p>			<p>Research tool</p> <p>Flowcytometry</p>
<p>KODE™-VB</p> <p>Water soluble synthetic constructs used to inhibit viral infection.</p>			<p>Pharmaceutical preparations</p>
